Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Welded Metal Bellows for Semiconductor competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. Metal bellows are elastic vessels that can be compressed when pressure is applied to the vessel, or extended under vacuum. When the pressure or vacuum is released, the bellows will return to its original shape. Especially welded bellows are manufactured by welding a number of individually formed diaphragms to each other. Welded metal bellows provide high reliability and long life for applications such as wafer lift and chamber lift, vacuum feedthroughs, and vacuum valve seals. Bellows are widely used in semiconductor equipment like CVD, PVD, ETCH, Ion Implanter, Lithography Machine, crystal growth furnace, IC packaging and testing equipment, wafer transfer robots, etc. According to Semiconductor Industry Association (SIA), global semiconductor chip sales hit \$627.6 billion in 2024, an increase of 19.1% compared to the 2023 total of \$526.8 billion. The global semiconductor market experienced its highest-ever sales year in 2024, topping \$600 billion in annual sales for the first time, and double-digit market growth is projected for 2025. Semiconductors enable virtually all modern technologies ? including medical devices, communications, defense applications, AI, advanced transportation, and countless others ? and the long-term industry outlook is incredibly strong. Regionally, yearly sales were up in the Americas (44.8%), China (18.3%), and Asia Pacific/All Others (12.5%), but down in Japan (-0.4%), and Europe (-8.1%). Several semiconductor product segments stood out in 2024. Sales of logic products totaled \$212.6 billion in 2024, making it the largest product category by sales. Memory products were second in terms of sales, increasing by 78.9% in 2024 to a total of \$165.1 billion. DRAM products, a subset of memory, recorded an 82.6% sales increase, the largest percentage growth of any product

category in 2024.

The global Welded Metal Bellows for Semiconductor market size was estimated at USD 199.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 7.00% during the forecast period.
