Abstracts

White Top Kraftliner and Testliner are both high-strength paperboards used for packaging and printing, but their raw materials and characteristics are different. White Top Kraftliner is made from virgin wood pulp, with a smooth and white surface, high burst resistance, stiffness and printability, and is suitable for high-end packaging, color-printed packaging boxes and other applications that require high-quality appearance and strength. White Top Testliner is produced from recycled pulp, which is environmentally friendly and low-cost, while still having good physical strength and printing properties, and is suitable for general commodity packaging and logistics packaging. Both can be used to make cartons, cartons, etc., but virgin pulp products are more suitable for scenarios with higher requirements for printing effects and load-bearing capacity.
