Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Whiteboard Markers competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. Whiteboard Markers are non-permanent, alcohol-based or solvent-based writing instruments designed specifically for use on glossy whiteboard surfaces. They feature a porous, felt-tip nib that delivers smooth, skip-free ink flow, ensuring clear and vibrant lines. The quick-drying, low-odor ink is easily erasable with a dry cloth or whiteboard eraser, leaving no residue or ghosting. These markers typically come in a range of colors (e.g., black, blue, red, green) and tip sizes (fine, medium, broad) to suit various presentation and annotation needs. Key characteristics include low toxicity, fade resistance, and refillable/reusable designs in some models, making them essential tools for offices, classrooms, and collaborative workspaces. The whiteboard marker market is currently showing a steady growth trend, mainly driven by the needs of corporate offices, educational institutions and remote collaboration. Although digital tools (such as electronic whiteboards) have replaced the high-end market to a certain extent, traditional whiteboard pens still dominate the mainstream with their low cost and ease of use. International brands dominate the mid-to-high-end market, while local manufacturers are rapidly expanding in developing markets through cost-effective strategies. Environmental regulations promote the upgrading of sustainable products such as water-based inks, but the industry as a whole faces pressure from intensified price competition and declining profit margins. Future market growth will rely on two major directions: one is environmental innovation, including the application of degradable materials and low-VOCs ink technology; the other is functional optimization, such as differentiated designs such as anti-dry tip and quick drying. In addition, the popularity of online channels and B-end customized needs (such as corporate LOGO

printing) are becoming new growth points. In the long run, the whiteboard marker industry needs to adapt to the dual trends of digitalization and sustainable development while maintaining basic needs in order to maintain its competitiveness.

The global Whiteboard Markers market size was estimated at USD 1375.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 4.40% during the forecast period.
