Abstracts

A whole kitchen water purifier is an integrated water purification device designed specifically for the kitchen environment, which can provide unified purification treatment for all water points in the kitchen (such as vegetable sinks, faucets, water purifiers, etc.). It is usually installed under the cabinet or near the water source, and removes impurities, residual chlorine, heavy metals, bacteria and other harmful substances in tap water through multi-stage filtration (such as PP cotton, activated carbon, ultrafiltration membrane, RO reverse osmosis membrane, etc.). Some high-end models also have a dual water outlet design, which can distinguish "clean water" from "pure water" to meet the different needs of daily washing and direct drinking.
