Report Overview

Window washing pads are cleaning tools designed specifically for cleaning glass surfaces, typically consisting of absorbent, non-abrasive materials like microfiber or sponge layers that can hold cleaning solutions and remove dirt, grime, and streaks without scratching the glass. These pads often feature ergonomic designs for ease of use, with some models incorporating handles or attachments for window squeegees to improve efficiency. They are widely used in both residential and commercial settings, including homes, office buildings, and retail spaces, where streak-free, spotless windows are essential for aesthetics and visibility.
