Abstracts

Over-ear headphones, also called around-ear headphones, are among the most popular types. While they can be a little bulky and don't breathe as well as in- or on-ears, most people find them the most comfortable headphones for extended listening periods. They often have more features than many in-ear or earbud options and have longer batteries than their smaller, more portable counterparts. Wireless Over-Ear Headphone are for people who want to totally immerse themselves in their listening or don't like the feeling of earbuds in their ears.
