Report Overview

The cross-linking technology is based on entirely 'dry' cross-linking and cooling process. This eliminates micro inclusions of water from the insulation which, unless prevented, lead to so called 'water treeing' effect. A triple crosshead extrudes the screen over the conductor and screen over insulation in a single technological operation. All that gives the cable excellent electrical, thermal and mechanical properties. XLPE insulated Cable is better than PVC insulated Cable, but the price is a little higher.
