Z-Wave was developed by Zensys as a proprietary wireless standard, which was later acquired by Sigma Designs in 2008. Z-Wave is a wireless home automation protocol which runs on 908.42 MHz frequency band. Z-Wave technology works on the principle of mesh network technology, which means that one Z-Wave product will pass the signal to another until it reaches its intended destination. Z-Wave technology uses low-power radio embedded or retrofitted RF signals in home -electronics devices and systems such as home entertainments and household appliances, among others.
