Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Zinc Sulfide Planar Windows competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, global production of zinc sulfide flat windows reached 78,000 units, with an average selling price of \$1,020 per unit. Zinc sulfide flat windows are planar optical components made from zinc sulfide (ZnS). Their core material is typically polycrystalline zinc sulfide produced by chemical vapor deposition (CVD) or hot pressing. They offer broadband light transmission (covering the visible to long-wave infrared, 8-14 μ m) and a flat surface, making them suitable for applications requiring uniform light transmission or protection in optical systems. This window achieves low absorption (absorption coefficient
