### Report Overview

Green Plum Antidiarrhea Granules are a traditional Chinese herbal medicine formulated to treat diarrhea and related gastrointestinal symptoms. The product typically contains natural ingredients such as green plum (*Prunus mume*), which has astringent properties, along with other herbs like coptis root and phellodendron bark, known for their antibacterial and anti-inflammatory effects. Marketed as an over-the-counter remedy, it appeals to consumers seeking natural alternatives to synthetic antidiarrheal drugs. The granules are often positioned as a convenient, fast-acting solution for acute diarrhea, digestive discomfort, and foodborne illnesses, catering to both adult and pediatric use in some formulations. Demand is driven by increasing consumer preference for herbal medicine, rising gastrointestinal health awareness, and the product's integration into traditional Chinese medicine (TCM) practices. However, competition exists from both pharmaceutical antidiarrheals and other TCM alternatives, requiring differentiation through efficacy claims, brand trust, and accessibility in pharmacies, e-commerce, and health stores. Regulatory compliance, especially in markets outside China, and scientific validation of its benefits remain critical for growth.
