Report Overview

Halogen-free Flame-retardant PET Masterbatch is a specialized compound material designed for enhancing the flame resistance of PET (Polyethylene Terephthalate) polymers without the use of halogenated compounds. This masterbatch is engineered to provide a high level of flame retardancy, ensuring that the final PET products meet stringent safety standards. It is particularly useful in applications where materials must be resistant to ignition and self-extinguishing, such as in the electronics, automotive, and construction industries. The absence of halogens in the masterbatch is a significant advantage, as it reduces the environmental impact and health risks associated with halogenated flame retardants, which can release toxic gases when burned. The product is formulated to maintain the mechanical properties of PET, ensuring that the flame retardancy is achieved without compromising the material's strength, flexibility, or durability.
