Report Overview

Halogen Free Flame Retardant Tape is a specialized type of adhesive tape designed for applications requiring flame resistance without the use of halogenated compounds. This tape is engineered to meet stringent safety and environmental standards by incorporating non-halogenated materials that effectively retard the spread of flames. It is typically made from a base material such as polyester or fiberglass, coated with a flame-retardant adhesive that does not contain bromine or chlorine, which are common in traditional halogenated flame retardants. The tape is used in various industries, including electronics, aerospace, and automotive, to provide insulation, protection, and structural support in components that must withstand high temperatures or are exposed to potential fire hazards. Its non-halogen content makes it a preferred choice in applications where the release of toxic gases during combustion is a concern, aligning with the growing demand for more sustainable and eco-friendly materials in product design.
