Report Overview

High I+G Yeast Extracts are a type of food ingredient derived from yeast, specifically *Saccharomyces cerevisiae*. These extracts are rich in nucleotides, particularly inosine monophosphate (IMP) and guanosine monophosphate (GMP), which are responsible for their unique savory taste, known as umami. The high content of I+G (IMP+GMP) in these extracts is what distinguishes them from regular yeast extracts. They are commonly used in the food industry to enhance the flavor of various products, such as soups, sauces, meat products, and snacks, by providing a deep, savory taste without adding significant salt content.
