Report Overview

Highly Concentrated Neutral Cellulase Powder is a specialized enzymatic product designed for various industrial applications, particularly in the textile, paper, and detergent industries. This product is formulated by combining multiple cellulase enzymes that act synergistically to break down cellulose, the primary component of plant fibers. The "neutral" in the product name refers to the enzymes' optimal pH range, which is typically around 6-7, making them suitable for use in environments where a neutral pH is preferred. The powder form allows for easy handling, storage, and precise dosing in various processes. It is highly concentrated, meaning it contains a high amount of active enzymes per unit weight, which enhances its efficiency and cost-effectiveness in breaking down cellulosic materials, improving fabric softness, and enhancing the brightness of paper products.
