Abstracts

Home portable IPL (Intense Pulsed Light) hair removal device is a compact and handheld device specifically designed for personal use at home. It utilizes IPL technology to provide hair removal treatments in the convenience and privacy of one's own space. The home portable IPL hair removal device operates on the same principle as professional IPL devices used in salons and clinics. It emits pulses of intense light onto the skin, targeting the melanin in the hair follicles. The light energy is absorbed by the hair follicles, which converts into heat and damages the follicles, inhibiting hair growth over time.
