Abstracts

DTH is a way of drilling holes. The DTH drilling rig machine uses hammers and drill bits placed at the bottom of the hole to impact and crush the rock. DTH drilling equipment are widely used in metal mines, hydropower, transportation, building materials, harbors, and national defense projects. The rig machine price is relatively cheap, which makes the DTH rig machine especially suitable for small and medium-sized open-pit mines. The characteristic of the down-the-hole drilling rig is that the special impactor works in the hole, and the impact energy transfer efficiency of this direct rotary drilling rig is high. Full hydraulic down-the-hole (DTH) drilling rig is a drilling rig for sale that uses oil pressure to drive and control all moving parts in the process of adjusting the drill rod's forward and backward angle. With the help of the high-pressure variable oil pump and variable oil motor, this kind of drilling rig can complete step-less speed change, simplify the transmission mechanism, remove the gearbox, reduce the weight of the drilling rig, and make full use of power.

The global Hydraulic Down-The-Hole (DTH) Drill Rigs market size was estimated at USD 928.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 7.10% during the forecast period.
