Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on IBS (Intelligent Braking System) competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, global Intelligent Braking System (IBS) production reached approximately 30.42 million units, with an average global market price of around US\$250 per unit. An Intelligent Braking System (IBS) is an advanced automotive technology that integrates various electronic and sensor-based functions to enhance vehicle braking performance, safety, and responsiveness. It typically combines features such as anti-lock braking (ABS), electronic brake-force distribution (EBD), brake assist (BA), and automatic emergency braking (AEB) into a single, coordinated system. IBS works by continuously monitoring driving conditions and vehicle dynamics to optimize braking force and assist the driver in emergency situations. In more advanced applications, it is also linked to other safety and autonomous driving systems. The global market for Intelligent Braking Systems has been growing steadily due to increasing demand for vehicle safety, the development of autonomous driving technologies, and stricter government safety regulations. Automakers are under pressure to incorporate smarter safety solutions in both premium and mass-market vehicles. IBS plays a key role in modern safety architecture by reducing braking distance, preventing skidding, and supporting collision avoidance systems. The trend toward electrification and intelligent mobility further accelerates IBS adoption, as these systems are essential in electric vehicles and semi-autonomous driving platforms. Emerging markets are also witnessing rising adoption rates due to rising consumer awareness and regulatory changes. As the automotive industry transitions toward fully autonomous vehicles, IBS is expected to become a standard component across a wider range of models and segments.

The global IBS (Intelligent Braking System) market size was estimated at USD 7606.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 13.00% during the forecast period.
