Report Overview

An industrial magnetic reed switch is a type of electrical switch commonly used in industrial applications to detect the presence or absence of a magnetic field. It consists of two ferromagnetic contacts (reeds) sealed within a glass tube or encapsulated in a protective housing. When a magnetic field is applied to the vicinity of the switch, the reeds attract to each other, completing an electrical circuit. When the magnetic field is removed, the reeds return to their original position, breaking the circuit.
