Abstracts

A Intercom Video Doorbell is a communication system that allows two-way audiovisual communication between the inside and outside of a building, typically used to control access to the building. It consists of a video camera and a speaker or microphone installed at the entrance (called a door station), and a display screen and speaker inside the building (called the indoor unit). This system enables the person inside to see and hear visitors at the door, and, if desired, engage in conversation and grant access by unlocking the door remotely. It enhances security by allowing residents to visually verify visitors before permitting entry.
