Report Overview

The Ion Gun System is a specialized equipment designed to generate and control ionized gas, typically used in various industrial and scientific applications. This system works by emitting a stream of ions, which can be either positive or negative, to neutralize static electricity, clean surfaces, or assist in the deposition of thin films. The product consists of a power supply unit, an ion gun head, and sometimes additional components such as air filters or control modules. The ion gun head is responsible for generating the ionized gas, while the power supply unit provides the necessary voltage and current to operate the system.
