Report Overview

The Kaufman Ion Source is a type of ion source used in various scientific and industrial applications, particularly in mass spectrometry and ion implantation. It is named after its inventor, Dr. Harold Kaufman, who developed this technology in the 1960s. The Kaufman ion source operates by generating a high-density plasma using a combination of radio frequency (RF) and direct current (DC) power. This plasma is then used to ionize gas atoms or molecules, creating a beam of ions that can be extracted and directed towards a target or mass spectrometer.
