Report Overview

A Laminated PP Woven Bag is a type of packaging material made from polypropylene (PP) woven fabric that has been laminated to enhance its properties. This bag is characterized by its durability, water resistance, and strength, making it suitable for various applications such as packaging of agricultural products, construction materials, and other bulk items. The lamination process involves bonding the woven PP fabric with a layer of film, which can be made from materials like polyethylene or other polymers, to create a barrier against moisture, chemicals, and UV radiation.
