Report Overview

A landscape snow blower, also known as a snow thrower or snow blower, is a machine used to remove snow from outdoor areas such as driveways, sidewalks, and large open spaces. It is an essential tool in regions with heavy snowfall and is commonly used during the winter season. A landscape snow blower typically consists of a motor, an auger, and an impeller. The motor powers the machine and drives the auger, which is a rotating helical blade or a series of blades. The auger is responsible for scooping up the snow and breaking it into smaller pieces. The impeller, located at the discharge chute, then propels the broken snow out of the machine with force.
