Report Overview

Leuprorelin Acetate Microspheres for Injection is a pharmaceutical product that contains leuprorelin acetate, a synthetic analog of the naturally occurring gonadotropin-releasing hormone (GnRH). This medication is formulated as microspheres, which are small, spherical particles designed to provide a sustained release of the active ingredient over an extended period. The product is intended for intramuscular injection and is primarily used in the treatment of various hormonal-dependent conditions, such as prostate cancer, endometriosis, and central precocious puberty. The controlled release of leuprorelin acetate from the microspheres allows for a more consistent and prolonged therapeutic effect, reducing the frequency of injections compared to immediate-release formulations.
