Report Overview

A Leveling String is a specialized tool used in various construction, landscaping, and groundwork projects to ensure a uniform and level surface. It is typically a long, flexible string with a bubble level attached at one end. The string is stretched across the area to be leveled, and the bubble level is used to determine if the string is parallel to the ground. If the bubble is centered in the level's vial, the string is level, indicating that the surface below is also level.
