Report Overview

Ligustrazine Phosphate Injection is a pharmaceutical product derived from the active ingredient ligustrazine (tetramethylpyrazine), a compound extracted from the Chinese herb *Ligusticum chuanxiong*. It is primarily used in clinical settings to improve microcirculation, dilate blood vessels, and inhibit platelet aggregation, making it effective in treating cardiovascular and cerebrovascular diseases such as ischemic stroke, coronary heart disease, and angina pectoris. The injection form ensures rapid bioavailability and is often administered in hospitals for acute conditions. Its mechanism of action involves modulating calcium channels and reducing oxidative stress, which contributes to its therapeutic effects. As a traditional Chinese medicine (TCM)-based modern drug, it occupies a niche in the pharmaceutical market, particularly in China and other regions where integrative medicine is practiced. The product is subject to stringent regulatory standards to ensure safety and efficacy, given its injectable nature and use in critical care.
