### Report Overview

Liquid and gel firestarters are specialized products designed to ignite fires quickly and efficiently, commonly used in outdoor activities such as camping, grilling, and survival situations. These firestarters typically consist of flammable liquids or gels that burn at high temperatures, ensuring reliable ignition even in damp or windy conditions. Unlike traditional fire-starting methods, they offer convenience, portability, and controlled burn times, making them popular among outdoor enthusiasts, emergency preparedness groups, and military personnel. The market is segmented by product type (alcohol-based, petroleum-based, or bio-based), application (residential, commercial, industrial), and distribution channels (online retail, specialty stores, supermarkets).
