Report Overview

Low Backlash Planetary Gearboxes (Less than 10 arcmin) are precision mechanical devices designed to transmit rotational motion and torque between a driving and driven shaft. These gearboxes feature a compact, planetary gear arrangement, which consists of a central sun gear, surrounding planet gears, and an outer ring gear. The key characteristic of these gearboxes is their exceptionally low backlash, which is less than 10 arcminutes. This low backlash ensures high precision and accuracy in applications requiring smooth and controlled motion, such as in robotics, automation, and precision machinery. The low backlash is achieved through advanced manufacturing techniques and precise tolerances, which minimize the play between the gears and result in a more efficient and reliable transmission of motion.
