Report Overview

Low Protein Natural Rubber Latex (LPNRL) is a specialized type of natural rubber latex that has undergone a unique manufacturing process to significantly reduce the protein content compared to standard natural rubber latex. This reduction in protein content is crucial for individuals with latex protein allergies, as it minimizes the risk of allergic reactions. LPNRL is derived from the sap of the *Hevea brasiliensis* tree and is known for its high elasticity, strength, and resilience. It is extensively used in the medical industry for manufacturing gloves, catheters, and other medical devices due to its hypoallergenic properties and superior tactile sensitivity. The low protein content also helps in reducing the risk of Type IV delayed hypersensitivity reactions, making LPNRL a preferred choice for healthcare professionals and patients with latex sensitivities.
