### Report Overview

Lycium barbarum polysaccharide (LBP) is a bioactive compound extracted from the fruit of Lycium barbarum, commonly known as goji berry. It is primarily composed of complex carbohydrates, including arabinose, galactose, glucose, rhamnose, and mannose, and is recognized for its immunomodulatory, antioxidant, and anti-aging properties. LBP is widely used in the nutraceutical, pharmaceutical, and cosmetic industries due to its potential health benefits, such as enhancing immune function, reducing oxidative stress, and improving metabolic health. The compound is typically standardized in supplements and functional foods, with growing demand driven by increasing consumer awareness of natural health products and preventive healthcare. The market for LBP is expanding, particularly in regions like China, where traditional medicine supports its use, as well as in North America and Europe, where demand for plant-based bioactive ingredients is rising. Regulatory approvals, clinical research validating its efficacy, and advancements in extraction technologies further contribute to market growth.
