Abstracts

A manned atmospheric diving system (ADS) is a special piece of equipment used for deep-sea diving, designed to allow divers to work in high-pressure environments without being affected by underwater pressure. Unlike traditional diving methods, ADS keeps the internal air pressure the same as the surface air pressure, allowing divers to move and work freely in deeper waters without having to wear complicated diving suits or use compressed air.

The global Manned Atmospheric Diving System Ads market size was estimated at USD 350.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 4.50% during the forecast period.
