Abstracts

Cone-beam computed tomography systems (CBCT) are a variation of traditional computed tomography (CT) systems. The CBCT systems used by dental professionals rotate around the patient, capturing data using a cone-shaped X-ray beam. A significant driver in the medical cone beam computed tomography (CBCT) market is the increasing demand for advanced imaging technology in dental and maxillofacial applications. CBCT offers high-resolution 3D images with lower radiation exposure, making it valuable for dental diagnostics, implant planning, and orthodontic treatments. However, a notable challenge in this market is the cost of CBCT systems and the need for specialized training. Ensuring affordability and accessibility, as well as providing adequate training for healthcare professionals to maximize the benefits of CBCT technology, are essential challenges. Manufacturers and healthcare institutions must address these challenges to expand the adoption of CBCT technology in the dental and maxillofacial fields.

The global Medical Cone Beam Computed Tomography market size was estimated at USD 3323.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 9.40% during the forecast period.
