### Report Overview

Metal and Plastic Strapping is a versatile and essential packaging material used for securing and stabilizing various products during transportation and storage. It typically consists of thin, flexible strips made from either metal (such as steel or aluminum) or plastic (like polypropylene). These strapping materials are designed to provide strong, reliable, and tamper-evident fastening for a wide range of applications, including bundling, palletizing, and unitizing. Metal strapping offers high tensile strength and resistance to corrosion, making it suitable for heavy-duty applications, while plastic strapping is lightweight, cost-effective, and easy to handle, making it ideal for lighter loads and sensitive goods.
