Abstracts

Machine Learning as a Service (MLaaS) is machine learning technology that is conscripted from another business. This is similar to SaaS (Software as a Service) or PaaS (Platform as a Service), meaning you use the services of a company, rather than wholly create your own. Using MLaaS means the computation is handled outside of your company ? you pay for the machine learning services you need, and data storage may be handled on your personal servers or in the cloud (usually offered with MLaaS providers). MLaaS software can be used to automatically analyze online product reviews and respond to customers, streamline processes by automating tasks like ticket routing, and even power self-driving cars.

The global MLaaS Platform market size was estimated at USD 2920.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 19.50% during the forecast period.
