### Report Overview

Model Based Definition (MBD) is a modern product development approach that utilizes advanced 3D modeling techniques and digital data to define and document a product's design, manufacturing, and inspection requirements. Instead of relying on traditional 2D drawings, MBD integrates all necessary information, such as dimensions, tolerances, and material specifications, directly into a 3D model. This approach streamlines the design-to-manufacturing process, reduces errors, and improves communication among stakeholders. MBD enables manufacturers to directly use the 3D model for production, inspection, and quality control, enhancing efficiency and accuracy while minimizing the risk of misinterpretation or discrepancies between the design and the final product.
