Report Overview

Mohair high count yarn is a premium textile material derived from the hair of Angora goats, known for its exceptional softness, luster, and durability. Characterized by its fine, tightly spun fibers, high count mohair yarn is measured by its high thread count (typically above 40s), indicating superior fineness and quality. This yarn is highly sought after in luxury fashion, high-end knitwear, and bespoke tailoring due to its lightweight yet insulating properties, as well as its ability to blend seamlessly with other fibers like silk or cashmere. Its natural elasticity and resistance to creasing make it ideal for fine garments, upholstery, and accessories, catering to discerning consumers who prioritize both aesthetics and longevity. The niche market for mohair high count yarn is driven by demand for sustainable, natural fibers in the luxury segment, with key production hubs in South Africa, Turkey, and the U.S., where ethical sourcing and animal welfare standards play a significant role in branding and pricing.
