## Abstracts

Monocrystalline PERC Half-Cell Modules have solar cells that are cut in half, which improves the solar module's performance and durability. Traditional 60-cell and 72-cell solar panels will have 120 half-cut cells and 144 half-cut cells, respectively. When solar cells are halved, their current is also halved, so resistive losses are lowered and the solar cells can produce more power.

The global Monocrystalline Perc Half Cell Module market size was estimated at USD 58042.5 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 8.65% during the forecast period.
