Report Overview

Nicotinamide Riboside Chloride (NR) is a naturally occurring compound and a precursor to Nicotinamide Adenine Dinucleotide (NAD⁺), a crucial coenzyme involved in various cellular processes, including energy metabolism, DNA repair, and cellular signaling. NR is particularly significant due to its ability to boost NAD⁺ levels in cells, which decline with age, contributing to age-related decline in cellular function. As a dietary supplement, NR is marketed for its potential to enhance mitochondrial function, support healthy aging, and improve overall cellular health. It is often used in the context of anti-aging and health optimization, with research exploring its effects on metabolism, cognitive function, and longevity.
