Report Overview

A non-flat standing mat is an ergonomic accessory designed to provide support and comfort to individuals who stand for extended periods. Unlike traditional flat mats, a non-flat standing mat features varied terrain or contours, encouraging subtle movements and shifts in posture. These mats often incorporate raised edges, bumps, or ridges that promote micro-movements, helping to stimulate blood circulation and reduce fatigue. The dynamic surface of a non-flat standing mat engages different muscles and joints, preventing stiffness and discomfort associated with prolonged standing.
