## Abstracts

Disposable e-cigarettes are convenient, accessible vapes that are ready to smoke as soon as you unwrap them. They can't be recharged or refilled with e-juice and are recycled and repurchased after use. They're great for beginners and cheaper than rechargeable vapes, and they are safer, as they can't be modded. With no activation button, you can simply inhale and vape without the nonsense of filling in liquid, putting it together, or charging beforehand like some other vapes out there.
