Report Overview

Octabromobisphenol-S (OB-S) is a brominated flame retardant chemical compound, specifically an octabromobiphenol derivative. It is characterized by its chemical formula $C_{12}H_4Br_8O_2$, which indicates that it contains two benzene rings (biphenol), eight bromine atoms, and two oxygen atoms. OB-S is primarily used as an additive flame retardant in various polymers, including polystyrene, polycarbonate, and polyurethane foams, to enhance their fire resistance and reduce the risk of fire-related hazards. It is known for its high thermal stability and effectiveness in preventing the spread of flames, making it a valuable component in the production of flame-retardant materials for applications in electronics, construction, and transportation industries. However, due to concerns over its environmental persistence and potential health impacts, the use of OB-S has been restricted or banned in some regions.
