### Report Overview

Old Corrugated Container (OCC) refers to a specific type of paper waste that is generated from used corrugated cardboard boxes. These boxes are typically used for packaging and shipping purposes in various industries. OCC is characterized by its corrugated structure, which consists of a fluted paper layer sandwiched between two flat linerboard layers. The product is widely recycled due to its high demand for repurposing into new corrugated cardboard products. The recycling process of OCC involves sorting, cleaning, and repulping the material to remove contaminants and prepare it for reuse in the manufacturing of new cardboard boxes. This recycling helps in reducing waste, conserving resources, and minimizing environmental impact.
