### Report Overview

The one-arm collaborative robot (cobot) is a type of industrial robot designed to work safely alongside humans without the need for extensive safety barriers. Unlike traditional industrial robots, which operate in isolated workspaces due to high-speed movements and heavy payloads, cobots are equipped with advanced sensors, force-limiting mechanisms, and intuitive programming interfaces, making them adaptable for tasks requiring precision and flexibility. These robots typically feature a single articulated arm with multiple degrees of freedom, enabling applications such as assembly, pick-and-place, machine tending, and quality inspection. Their lightweight and compact design allows easy integration into existing production lines, while their ability to be quickly reprogrammed supports small-batch and high-mix manufacturing. The growing demand for automation in industries like electronics, automotive, and healthcare, combined with labor shortages and the need for cost-effective solutions, has positioned one-arm collaborative robots as a key technology in Industry 4.0 and smart manufacturing.
