Abstracts

An onion leaf and stem cutting machine is a specialized piece of equipment used in the food industry for cutting and processing onion leaves and stems. It is designed to automate the tedious and time-consuming task of manually cutting and separating onion greens from the bulbs. The machine typically consists of a conveyor belt or feeding system that transports the onion plants to the cutting area. The cutting mechanism may involve rotating blades or a series of sharp cutting disks. The onion plants are fed into the machine, and the cutting mechanism swiftly and efficiently cuts off the leafy green part of the onion while separating it from the bulb.
