Report Overview

Outdoor Flame Retardant Cable is a specialized type of electrical cable designed for outdoor applications where resistance to fire and environmental exposure is crucial. This cable is engineered with a flame retardant material in its insulation and jacket, which helps to slow down or prevent the spread of flames in case of a fire. It is typically used in various outdoor settings such as construction sites, industrial areas, and public spaces where there is a heightened risk of fire or where the cable may be exposed to harsh weather conditions.
