Report Overview

An Overhead Type Exhaust System is a mechanical ventilation setup designed to manage and expel fumes, smoke, and other airborne contaminants from industrial or commercial environments. This system is characterized by its overhead installation, typically mounted on the ceiling or upper walls, to capture and remove pollutants directly from the source. It is engineered to maintain a safe and healthy working atmosphere by efficiently extracting harmful substances, thereby reducing the risk of exposure to workers and ensuring compliance with safety regulations. The system may incorporate various components such as ductwork, fans, filters, and silencers to facilitate the smooth and quiet operation of the exhaust process.
