## Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on PCIe Jitter Attenuator competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. PCIe Jitter Attenuator is a core clock management component in high-speed serial communication, tasked with effectively filtering and minimizing undesirable phase noise and random jitter components in the PCI Express bus clock signal, thereby ensuring optimal data transmission Signal Integrity, link reliability, and system performance. In 2024, the global production volume of PCIe Jitter Attenuators was 11.67 million units, and the average price was \$12/unit. The 2024 annual production capacity per single line was approximately 20,000 units, and the average gross margin was approximately 51%. The PCIe Jitter Attenuator supply chain consists of Upstream, Midstream, and Downstream segments. The Upstream segment mainly provides core wafer fabrication, advanced packaging, and testing services, with top supplier representatives including TSMC, Amkor Technology, and ASE Technology Holding; the Midstream segment focuses on the specialized design, manufacturing, and supply of PCIe Jitter Attenuator chips; the Downstream market covers end-application fields with strict requirements for high-speed data transmission, specifically including Automotive use, Industrial use, and Consumer Electronics, with top Downstream company representatives being Tesla, Siemens, and Dell. As Artificial Intelligence, cloud computing data centers, autonomous driving, and high-speed network infrastructures rapidly expand, the demand for data bandwidth is increasing exponentially. The PCI Express standard continues to evolve towards higher data rates, such as Gen5 and Gen6, imposing increasingly stringent requirements on clock signal quality. As a critical technology ensuring the reliability of high-speed interconnects, the market demand for PCIe Jitter Attenuators will be strongly propelled by these trends, projecting a robust

and sustained growth trajectory in the coming years.

The global PCIe Jitter Attenuator market size was estimated at USD 140.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 10.00% during the forecast period.
