## Abstracts

PE breathable film production line is a production line for producing PE breathable film. PE breathable film is a plastic film with breathable properties, mainly used in the hygiene industry, such as baby diapers and women's hygiene products. The characteristics of the PE breathable film production line include: the screw adopts a mutant screw design, which can be used for the mixing of PE and calcium carbonate. The extrusion die adopts a coat hanger die, combined with a static mixer, which makes it difficult for the material to produce fine spots. The forming table adopts chilled casting design, which has the characteristics of good dispersion, uniform plasticization, convenient operation of machine acceleration and deceleration, and easy adjustment. The film thickness is fed back by X-ray automatic thickness gauge and adjusted by automatic die head.
