Report Overview

PEG-3 Glyceryl Cocoate is a synthetic compound derived from the esterification of glyceryl and cocoate. It is a non-ionic surfactant, which means it does not have a charge and is less likely to react with other charged molecules. This product is commonly used in the formulation of personal care and cosmetic products due to its emulsifying, solubilizing, and moisturizing properties. The "PEG-3" in its name indicates that it contains three ethylene oxide units, which contribute to its water solubility and ability to form micelles. PEG-3 Glyceryl Cocoate is known for its mildness and is often used in creams, lotions, and other products where a gentle, non-irritating surfactant is required. It helps in improving the texture and stability of formulations, while also providing a smooth feel and enhanced skin hydration.
