Abstracts

Pet blood glucose monitoring system is a medical device used by pet owners and veterinarians to measure the blood glucose levels of pets, such as dogs and cats, with diabetes. The system typically consists of a glucose meter, test strips, and a lancet device to obtain a small blood sample from the pet. Pet owners can use the system to monitor their pet's blood glucose levels at home, which is especially important for pets with diabetes that require insulin injections. Regular monitoring can help pet owners adjust their pet's insulin dose and manage their pet's diet and exercise regimen. Some pet blood glucose monitoring systems can also store the pet's blood glucose readings over time, allowing for easier tracking and analysis of trends in the pet's blood glucose levels.

The global Pet Blood Glucose Monitoring System market size was estimated at USD 65.8 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 8.45% during the forecast period.
